

# February 2025 Partnership Update

## ACS CancerRisk360™

To improve cancer prevention and risk reduction, the American Cancer Society (ACS) developed ACS CancerRisk360™. This interactive online tool provides a personalized, comprehensive assessment of cancer risk along with resources to empower and enable individuals to help reduce their risk of cancer through healthy lifestyles, regular cancer screening, and genetic counseling and testing direction.

## Cancer Facts & Figures 2025

*Cancer Facts & Figures 2025* is an educational companion for *Cancer Statistics, 2025*, a scientific paper published in the American Cancer Society journal *CA: A Cancer Journal for Clinicians*. Highlights from the annual report include:

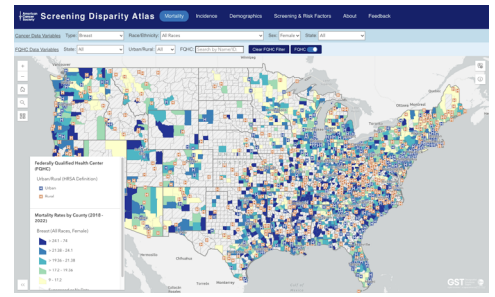

- Estimated numbers of new cancer cases and deaths in 2025 by cancer site and US state
- Current cancer incidence, mortality, and survival statistics
- Information on cancer symptoms, risk factors, early detection, and treatment

## STEPS Guide for Increasing CRC Screening Rates in Primary Care Practices

The American Cancer Society National Colorectal Cancer Roundtable (ACS NCCRT) developed the STEPS for Increasing Colorectal Cancer Screening Rates: A Manual for Primary Care Practices to offer evidence-based, expert-endorsed recommendations to help improve colorectal cancer (CRC) screening rates in primary care practices. Resources include case studies from exemplary and diverse practices from across the country, as well as field-tested tools, templates, and resources to help practices get started. This easy-to-read guide offers information on the importance of improving CRC screening rates and how the manual will help primary care teams achieve this goal.
