

October 2025 Partnership Update

ACS and Epic Content Integration Webinar

Join the American Cancer Society (ACS) and Epic Systems for an insightful overview of the patient education materials developed by ACS and their integration into Epic electronic health systems. The webinar will provide an update on the content available for usage, what to expect next, and a demo on platforms like eSyM highlighting how to access materials from your Epic Foundation System.

The webinar will take place at 12 p.m. ET on Thursday, October 16, 2025.

New Videos Available from ACS

Preserving Fertility During Cancer Treatment

This video explains fertility preservation options for women, men, and adolescents undergoing cancer treatment. Viewers can learn about available techniques and how to make a plan with their health care team. Coming soon in Spanish!

[Watch and share](#)

Understanding Lung Cancer Staging Video Series

This in-depth video series on lung cancer staging shows how tumor size, lymph node involvement, and metastasis impact diagnosis and treatment planning. Viewers can learn who performs staging, when it's done, and how biopsy procedures guide care decisions. Coming soon in additional languages!

Upcoming ECHO Webinars

Building Pathways to Fertility Preservation in Cancer

ACS is proud to partner with the Alliance for Fertility Preservation on an ECHO program to assist health care professionals in building systems to increase access to fertility preservation for people with cancer. The target audience for this program is multidisciplinary care teams, including cancer care, reproductive endocrinology, hospital administration, and advocacy organizations.

Sessions will begin at 12 p.m. ET on Tuesday, September 23, 2025.

Prostate Cancer Screening in Primary Care (Cohort 2)

This ECHO program is designed to support primary care clinicians navigating the complexities of prostate cancer screening. It tackles key challenges, including when to initiate screening, how to identify appropriate candidates, how to minimize harm and overdiagnosis, how to interpret prostate-specific antigen (PSA) results, and how to determine the right time for referral. MDs, DOs, NPs, and PAs in adult primary care who handle PSA testing and specialty referrals are the target audience for this program.

Sessions will begin at 12 p.m. ET on Tuesday, September 23, 2025.

Addressing Breast Density & Risk in Primary Care (Cohort 2)

This program is designed to help primary care clinicians gain clarity on screening and risk management for patients with dense breasts, family history of breast cancer, or genetic markers for breast cancer. The ECHO program will cover topics including supplemental screening recommendations, risk assessment models, and using shared decision-making to help patients arrive at informed decisions.

Sessions will begin at 4 p.m. ET on Tuesday, October 7, 2025.

Understanding Multi-cancer Detection Testing

ACS has developed an ECHO program to help equip primary care clinicians and multidisciplinary cancer care teams with a foundational understanding of multi-cancer detection (MCD) tests. The sessions will also help attendees understand how to use evidence-based communication about potential risks, benefits, and uncertainty of MCD tests and their results in cancer screening.

Sessions will begin at 11 a.m. ET on Tuesday, October 14, 2025.
