

# April 2026 Partnership Update

## Personalized Brain Tumor Navigation Support

The American Cancer Society (ACS) is helping connect eligible patients and caregivers to high-touch, personalized navigation support through our collaboration with the Brain Tumor Network (BTN).

BTN is a free, nationwide organization that supports families by helping them better understand their options, coordinate care, access psychosocial resources, and receive personalized clinical trial matching and enrollment assistance. Although the organization does not provide medical advice, their team of experienced nurse and social work navigators helps empower patients and caregivers to make informed decisions.

You can also connect with ACS at our Cancer Helpline at 1-800-227-2345 24/7 for the latest information about cancer and be connected with a variety of services and resources.

## Understanding Multi-cancer Detection Testing ECHO: Cohort 2

ACS invites you to register for our upcoming Understanding Multi-cancer Detection Testing ECHO program. The goal of this program is to equip multidisciplinary cancer care team members and primary care clinicians with a foundational understanding of multi-cancer detection tests and help support evidence-based communication about these tests and their results in cancer screening.

Sessions will be held monthly at 11 a.m. ET on Tuesdays, starting April 28, 2026, through August 25, 2026.

# 2026 Rural Learning Community

ACS and the ACS National HPV Vaccination Roundtable are partnering with rural health care providers to expand knowledge and improve access to preventive care, including on-time HPV vaccination and other cancer screenings. Sessions, which began this month, will be held at 2 p.m. ET on the second Wednesday of the month in April, May, and June. They will provide practical strategies and peer-based learning to help participants implement evidence-based interventions that strengthen cancer prevention and screening efforts in their clinics and communities.

# Coping with a New Cancer Diagnosis

This newly released section on the ACS website, cancer.org, provides in-depth information on coping with a new cancer diagnosis. It features practical resources that can help people with cancer and their loved ones find support, understand what to expect, and learn how to move forward. This includes how to manage the changes in their life, getting organized, and the next steps after a diagnosis.

**Coping with a New Cancer Diagnosis**

Learning you have cancer can be scary and overwhelming. You probably have a lot of questions and you may wonder what the road ahead will look like.

You are not alone. These practical resources can help you and your loved ones find support, understand what to expect, and learn how to move forward.

**What to expect after your diagnosis**

What is it like to have cancer? How will cancer affect my daily life? How do I make decisions about my treatment? Find answers to some of the most common questions people ask when they first learn they have cancer.

# Colorectal Cancer Prevention and Screening: Turning Data Into Action With Early-onset Insights and Best Practices

Join ACS and the ACS National Colorectal Cancer Roundtable for an engaging and insightful discussion of the latest data influencing colorectal cancer screening. The webinar will be at 1 p.m. ET Tuesday, March 31, 2026. Topics will include:

- Why colorectal cancer has become the leading cancer killer in adults under 50
- Tangible tools and resources you can use today
- Sharing best practices to drive better outcomes

[Register for the webinar](#)

# Biomarker Tests and Cancer Treatment

Cancer biomarkers are genes, proteins, or other substances that can be tested for to reveal important details about a person's cancer. ACS has resources that provide descriptions of what biomarkers are, how they are used for people with cancer, how testing is done, and questions to ask the cancer care team about biomarkers.
